PARTY IN HONOR OF NEIGHBORS AT ROSEBUD SCHOOL

A very jolly crowd of neighbors met at the Rosebud School on Friday evening last to bid farewell and express good wishes to Mr. and Mrs. F. Leeson and family. It is with great regret that the neighbors say good bye to them from the Rosebud district, but they are glad that they are moving only a short distance away and will therefore be still able to see and visit with them.

The Leesons were kidnapped from their home and taken over to the school. The evening was spent in singing, round games and dancing.

Just before lunch was served a "Mock Trial" was held at which Mr. and Mrs. Leeson were charged with being good neighbors. Much of the evidence caused shouts of laughter and the judge, Mr. Jim Phillipson, had difficulty in controlling the court. The defendants were found guilty. At this point two little girls, Margaret Thurlow and Wilda Shantz entered with a wagon piled high with gifts for the new farm kitchen, which they presented to Mr. and Mrs. Leeson.

The recipients thanked their friends and invited all to visit them in their new home. Lunch was served and a very enjoyable evening was brought to a close by singing "Auld Lang Syne" and "They are Jolly Good Fellows."

NOTICE

I have installed a new up-to-date hearse to my funeral equipment and am now ready to give the best up to date service obtainable.

W. S. DURRER.

Presentation Made By W.C.T.U. To Departing Member Enroute Africa

A pleasant afternoon was spent at the home of Mrs. C. J. Hallinan on Monday, the occasion being a farewell surprise when 30 and 40 members of the W.C.T.U. met in honor of Mrs. Florence A. Finlay, who left Tuesday for dark Africa.

A most appropriate musical program was rendered. Mesdames A. Traub and J. Shantz sang "Whispering Hope" while Mrs. Cunningham added humor with a humorous recitation. Mrs. Harder sang a very touching solo, "The sobbing of one thousand million souls who are dying."

Mrs. Finlay ably responded to an address in which she had the best wishes from the local union. The president, Mrs. H. M. Reiber, then pinned on her the union emblem, the white ribbon pin.

After refreshments a photograph was taken of the entire group by Mr. Scrutton, our local photographer.

LOCAL & GENERAL

About 20 members of King Crimson Lodge paid a visit to the Red Deer lodge on Tuesday evening.

I will have a carload of potatoes on truck on or about October 17th, all sacked. Apply to W. Burrell.

Mr. Alf Allen of the Royal Bank left on Thursday last for Beiseker where he is taking over the duties of teller-accountant in the bank there.

The W.I. will meet at the home of Mrs. Dr. J. L. Clarke on Tuesday afternoon, October 15, at 2:30. Mrs. Grevitt, W.C.T.U. worker, will speak. A good attendance will be welcomed. Members will note that the regular meeting date has been changed to take advantage of Mrs. Grevitt's visit.

ONE KILLED; TWO INJURED IN OLDS CROSSING ACCIDENT

David Miller, 63 years of age, is dead, and his son Arthur, and Stanley Hunt of Carstairs are in the Olds Hospital, as a result of a collision between an automobile and a passenger train 150 yards north of the Olds depot Saturday noon last.

Mr. Miller Sr., was badly hurt, both legs being cut off as well as other serious injuries, and died two hours after being admitted to the hospital. Dr. W. G. Evans was called from Didsbury. Olds doctors being out of town at the time.

Arthur Miller is suffering from concussion of the brain and minor injuries. Hunt escaped any serious bodily injury but is suffering seriously from shock. Both are expected to recover.

The three men were travelling in a Ford coupe and were going west across the railway tracks when the car was struck by the southbound noon passenger train, which hurled the car about 30 feet.

W.C.T.U. Convention At Calgary Last Week; 25th Anniversary

The silver anniversary of the W.C.T.U. was celebrated at the Alberta convention which was opened Wednesday morning, October 2nd in Calgary by Mayor Osborne.

Mrs. L. C. McKinney of Clarendon, president of the Alberta union for more than 20 years, made an earnest plea to the delegates for greater support to fight the drink traffic.

His Worship Mayor Osborne, in extending the civic welcome, spoke of the union helping to make Alberta a better province in which to live, in which to grow and to bring up our children. "You have done a great deal with the school children. Along temperance lines, especially with the foreign-born, your educational work has been of great value to the province", he said.

Mrs. McKinney, Mrs. Dewar and Mrs. Bulyea were honored at the Wednesday evening session, being made world's life members. In the same session the story of the formation of the organization and its history of a quarter of a century was traced.

The election of officers Thursday afternoon resulted as follows:

Pres., Mrs. L. C. McKinney, Clarendon.

Vice-Pres., Mrs. Wm. White, Nanton.

Corr. Secy., Mrs. F. C. Grevitt, Edmonton.

Rec. Secy., Mrs. M. L. McPherson, Holden.

Treas., Mrs. J. T. Poole, Wetaskiwin.

Y. Secy., Mrs. G. F. Knight, Calgary.

L. T. L. Secy., Mrs. R. S. Martin, Edmonton.

Thursday evening a grand banquet was held in St. Paul's United Church.

Miss Melville Armstrong of Nanton won the medal in the Diamond Medal Contest.

A number of members were made life members of the union among which were Mrs. Oldham and Mrs. E. Boettger of Didsbury.

The convention closed Friday afternoon after selecting Red Deer as the point for the 1930 convention.

NOTICE

A public meeting will be held in the Rugby School House, Monday evening, October 14 under the auspices of the W.C.T.U. Mrs. Grevitt of Calgary will be the speaker. A silver collection will be taken.

Inter-School Track Meet Pronounced Big Success

Friday, October 4 was an ideal day for the annual inter-school track meet held in Didsbury. Six towns, Crossfield, Carstairs, Didsbury, Olds, Bowden and Innisfail were represented with the best of their athletes. Much credit must be given to the local teaching staff in in the manner the program was planned and everything started as the program stated, a feat not very often accomplished.

Olds gathered together 120 points to put them in first place. Didsbury followed a close second with 109. Innisfail third with 65, Crossfield fourth with 25 while Bowden and Carstairs tied with 12 points each.

Hubert Goorder of Olds was the highest individual scorer with 34

points and George Hawkes, Didsbury, second with 26, and Marjorie Shackleton, Olds, third, 20 points.

The teaching staff wish particularly to thank the gentlemen about town who so generously assisted to make the day a success and encourage athletics in the school; also to express their appreciation of the ready assistance given by the School Board.

The following is a list of medal winners in their classes:

Girls, 12 and under—

Marjorie Shackleton, Olds, 1.

Jean Methera, Crossfield, 2.

Irene Bellamy, Didsbury, 3.

Girls, Open—

Audrey Hooper, Innisfail and Margaret Fitzpatrick, Crossfield, 1.

Mary Sloan, Innisfail, 2.

Boys, 12 and under—

Goldwin Gabel, Didsbury and Don Hanson, Olds, 1.

Russell Carter, Innisfail, 3.

Boys, 15 and under—

George Hawkes, Didsbury, 1.

Leonard Berscht, Didsbury, 2.

James Laird, Innisfail and Norman Cuthbertson, Olds, 3.

Boys, Open—

Hubert Goorder, Olds, 1.

Melvin Cipperly, Olds, and

Frank Moyle, Didsbury, 2.

Results of events:

Girls (12 years and under)

Running hop, step and jump—1, Majorie Shackleton, Olds; 2, Jean Methera, Crossfield; 3, Betty Jackson, Innisfail.

Running high jump—1, Margaret Shackleton, Olds; 2, Irene Bellamy, Didsbury; 3, Mary Murdock, Crossfield.

Running broad jump—1, M. Shackleton, Olds; 2, Goldie, Carstairs; 3, Irene Bellamy, Didsbury.

Potato Race—1, Irene Bellamy, Didsbury; 2, G. Methera, Crossfield; 3, M. Locke, Bowden.

50 yards dash—1, Marjorie Shackleton, Olds; 2, I. Goldie, Carstairs; 3, Irene Bellamy, Didsbury.

Basketball throw—1, G. Methera, Crossfield; 2, G. Cuthbertson, Olds; 3, M. Stoll, Carstairs.

Girls' Open Events

Basketball throw—1, M. Downie, Carstairs; 2, Mary Sloan, Innisfail; 3, Holly Hunsperger, Didsbury.

75 yards dash—1, Mary Fitzpatrick, Crossfield; 2, Mary Sloan, Innisfail;

3, Margaret Grant, Olds.

Relay race—1, Innisfail; 2, Bowden; 3, Olds.

Running hop, step and jump—1, M. Fitzpatrick, Crossfield; 2, Audrey Hooper, Innisfail; 3, Holly Hunsperger, Didsbury.

Running broad jump—1, A. Hooper, Innisfail; 2, M. Grant, Olds; 3, M. Fitzpatrick, Crossfield.

Running broad jump—1, A. Hooper, Innisfail, and Irene Thompson, Innisfail (tie); 2, J. Newman, Bowden.

Boys (12 years and under)

Potato race—1, Goldwin Gabel, Didsbury; 2, D. Cameron, Bowden; 3, M. Hodge, Innisfail.

50 yards dash—1, Alfred Brusso, Didsbury; 2, D. Hanson, Olds; 3, G. Gabel, Didsbury.

Standing broad jump—1, R. Carter, Innisfail; 2, D. Hanson, Olds; 3, E. Kersey, Bowden.

Running broad jump—1, G. Gabel, Didsbury; 2, D. Hanson, Olds; 3, Jim Wright, Didsbury.

Running hop, step and jump—1, G. Gabel, Didsbury; 2, R. Carter, Innisfail; 3, A. Brusso, Didsbury.

High jump—1, D. Hanson, Olds; 2, R. Carter, Innisfail; 3, G. Gabel, Didsbury.

Boys (15 years and under)

75 yards dash (time 8.5)—1, Leonard Berscht, Didsbury; 2, Geo.

"WHERE QUALITY AND PRICE MEET"

Every tiny leaf is a storehouse of flavour

Removal Of Friction and Strife

The setting up of the organization of the League of Nations had, as its main object, the removal of those racial religious, economic and political animosities and suspicions which kept the nations of the world, and particularly the nations of Europe, in constant turmoil and ever on the verge of war. Because of the bitterness and suspicions thus kept alive and active, all nations armed to the teeth, one against another, while a multitude of restrictions and prohibitions to international intercourse were established.

Not only were national boundaries marked by lines of fortifications, but intricate systems of espionage were maintained, passports were required of people passing across boundary lines, different gauges were built by railways, customs posts established everywhere, and hostile tariffs imposed by one country upon the products of other countries.

Thus were the people of each country kept warned against the possible enmity of other countries, suspicions were never allowed to die down, a constant state of friction prevailed, and strife was uppermost in every mind.

It was as inevitable as the rising of the sun that such a state of mind among the peoples of the world must end in some gigantic conflict. It came in 1914, and all but ruined mankind, and nearly destroyed civilization. The statesmen of the world realized that unless something was done to remove these suspicions and causes of friction, it would be only a matter of time until another and still more colossal struggle would take place.

When it became operative, the League of Nations further realized that, if disarmament was to be brought about, armies and navies reduced, and the huge drain on mankind for warlike purposes ended, the real causes of war must be removed, suspicions lulled, and a true understanding developed among all people. In other words, that a proper spirit of international goodwill must replace the existing narrow and blatant nationalism rampant everywhere.

The League, therefore, set up the International Labor Office, with the object of improving the lot of workers in all countries, and to raise the standard of living of the masses of the people everywhere, realizing that, if people are contented and happy, and living under a fairly high standard, they will not be suspicious or jealous of others, nor quite so ready to plunge into war to better their own condition.

In like manner, the League has devoted its attention to many causes of sorrow and unrest in the world, and it is persistently seeking improvement in all departments of the world's work and methods of living.

It is because of many really great achievements in these directions, coupled with the horrors of the last war, that the minds of all people are today more open to receive and support plans for disarmament, and that, with the passing of the years, the prospects for permanent world peace become brighter.

World statesmen are now convinced that the greatest danger to the world peace is to be found in the realm of economics, in the rivalries of nations in the field of trade and commerce. This is the age of big business, the age of mechanics, mass production, and of endeavour to sell the surplus products of one nation in the markets of other nations. While this has been more or less true of all ages, and wars have been waged in order to seize territory with a view to later commercial exploitation or development, today the urge to secure new and larger markets is the strongest ally of those who clamor for large armies and huge navies.

Premier Briand's proposal for a United States of Europe is economic, rather than political. We venture to say it is not aimed at Great Britain, or the United States of America, but is designed to remove the multitude of restrictions which prevail all over Europe, isolating one nation from another, and doing economic hurt to all of them.

So, too, the Franco-British proposal for a two-year tariff holiday during which all nations would agree not to raise their tariffs, and meanwhile participate in a sincere international conference to determine ways and means whereby, without sacrificing the interests of any one country, a bigger measure of freedom in trade and commerce, and intercourse generally, could be devised.

The world is coming to realize and fully understand that trade barriers are now the most prolific cause of misunderstanding between nations, and the cause of more friction and heart-burning than anything else. Even Canada and the United States, which live side by side in such mutual understanding and goodwill, are more frequently disturbed over tariffs than any other one thing, or all other things put together.

The ideal condition of world free trade may be an impossible dream for some generations to come, but surely much of the present friction can be removed, and the world begin to trace the path that leads to the ultimately desired goal.

FARMER'S WIFE GETS STRENGTH

By Taking Lydia E. Pinkham's Vegetable Compound

Wilton, Ont.—"I am taking Lydia E. Pinkham's Vegetable Compound through the Change of Life. It helps me and I cannot praise it too highly. I was troubled with heat flashes and my limbs were heavy so I could hardly walk to do my farm work. I saw in the newspapers your ad about the Vegetable Compound and thought

to give it a trial. The first bottle gave me relief and I have told others what it does for me. I am willing for you to use my letter if you choose."—MRS. D. B. PETERS, Wilton, Ontario.

Ask Your Neighbor

Accelerated Schedules Feature C.P.R. Fall, Winter Time Table

New Schedules To Be In Effect Sunday, September 29th

The fall and winter time table of the Canadian Pacific Railway which will go into effect over the system on the last Sunday of September, features many important changes in passenger train service, among which is the speeding up of transcontinental trains, saving the coast traveller a matter of ten hours. These improved schedules are in line with the Company's policy of keeping abreast of the times and providing the best possible service to its patrons. The Company's ticket agents are now in possession of complete information, which is available to the public upon application.

A census is to be taken in more than 200 countries and colonies next year.

Postal Revenue

Now On a Level With What It Was Three Years Ago When Letter Rate Was 3 Cents

Postal revenue is now on a level with what it was three years ago despite the return to the 2 cent letter rate (in Canada, the United States and Mexico) in 1926, and that within the Empire on Christmas day, 1928. For the fiscal year ended March 31st, 1926, the revenue was \$31,025,000, and for the fiscal year ended March last, \$31,170,000.

RHEUMATIC PEOPLE CAN OBTAIN RELIEF

By Enriching Their Blood With Dr. Williams' Pink Pills

Rheumatism is a disorder of the blood. It attacks people when the blood is thin and impure, thus setting up inflammation of the muscles and joints. Wet or cold weather may start the pains of rheumatism, but is not the cause. The cause is in the blood. Hot applications or rubbing with liniments may ease the pain, but do not reach the cause and the pains are soon back again. To get rid of this most painful trouble you must treat it through the blood and for this purpose nothing else can equal Dr. Williams' Pink Pills, which from first does to last actually make new, rich blood, thus driving the rheumatic poisons from the system. Mr. Henry E. Amiro, Lower East Pubnico, N.S., tells what these pills did for him. He says:—"I had an attack of acute rheumatism so bad that I could not walk a hundred yards without so much suffering that I would feel faint. I could not do the least work, and any movement caused great pain. I was under the care of a doctor but did not improve much. Then reading of a similar case in a newspaper I decided to try Dr. Williams' Pink Pills. By the time I had used three boxes, there was no doubt they were helping me. I took altogether about a dozen boxes when I was entirely relieved of the trouble, able to walk four miles to my work, chop wood all day, and then walk home again. To anyone suffering from rheumatism I can strongly recommend Dr. Williams' Pink Pills."

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Greatest Wheat Exporters

Canada Stands At Top Of the List As Exporter Of Wheat

Canada stood first as an exporter of wheat during the 1927-28 crop year, with exports of 255,062,278 bushels. The United States came second with exports of 168,307,000; Argentina, third with 155,258,000 and Australia fourth, with 80,980,000 bushels. The report of the Bureau of Statistics also shows that for 1927-28 the world's wheat production was 4,815,400,000 bushels, of which Canada produced 479,665,000 bushels ranking third with Russia in the first place and the United States in the second.

When Asthma Comes do not despair. Turn at once to the help effective—Dr. J. D. Kellogg's Asthma Remedy. This wonderful remedy will give you the aid you need so sorely. Choking ceases, breathing becomes natural and without effort. Others, thousands of them, have suffered as you suffer but have wisely turned to this famous remedy and ceased to suffer. Get a package this very day.

Bananas are banned in Italy because they do not grow in that country or in any of its colonies. This is protection carried out to the limit.

Worms in children, if they be not attended to, cause convulsions, and often death. Mother Graves' Worm Exterminator will protect the children from these distressing afflictions.

Apples imported into England from Australia must in the future measure not less than two and one-quarter inches in diameter.

Tired Feet

Bathe with Minard's in warm water, rubbing into aching parts. Soothing and relieving.

Daring Stunt Flyers

"Four Musketeers Of the Air" Defy Death At Camp Borden

"Four Musketeers of the Air" is the title accorded a small group of Canadian aviators who are rapidly demonstrating to the world that while Canada's air force may not be the largest, it is very nearly, if not the best, at its own particular game.

The Musketeers are Squadron Leader C. McEwen, M.C., Flight Lieut. David A. Harding, famous rugby player, Pilot Officer E. McNab and Pilot Officer E. A. McGowan, all four being stationed at Camp Borden, and flying the Canadian army's Siskin pursuit plane.

At various exhibitions both here and in the United States, the Musketeers have thrilled thousands with their antics. At Cleveland, Ohio, recently, they stole the thunder from many more famous fliers who had performed there, and their performances were regarded as one of the most remarkable ever seen in the United States.

Camp Borden features individual stunting at the finishing part of a novice flyer's education. It is a means of obtaining perfection in the control of an aeroplane, and while formation flying is also taught and practiced, the individual practice of putting an aeroplane through its paces is more strongly endorsed.

One of the Musketeers' favorite stunts is a very spectacular one. The planes, starting in formation at around 3,000 feet, suddenly nose down. At terrific speed, with motors wide open, they spread out, fan-shaped, and suddenly zoom up. At the peak of the climb, with the motors nearly stopped, the planes gradually fall over backwards and fly for some distance upside-down.

Stop Colds with Minard's Liniment.

Visitors to the home of Charles Darwin in Kent, England, may now see the chair and writing board at which Darwin worked while writing his famous theory of evolution.

Sheep Ranching Expanding

Industry Is Showing Promising Development In British Columbia

The sheep industry from a ranching point of view shows signs of development in Western Canada, particularly in British Columbia, states the Department of Agriculture. Last fall upwards of 10,000 head of ewe stock were bought in Alberta and shipped to the interior points of British Columbia. In 1928, the demand for range ewes exceeded the supply and the demand promises to be equally as good this year.

All These Advantages For Farm Construction

For both old and new construction Gyproc gives more advantages than any other material. Makes durable, permanent walls and ceilings in less time and at less cost. Cannot warp, crack, shrink or burn, and is ideal for lining houses, garages, poultry houses, barns, grain bins and all other farm buildings.

Migration of British Juveniles For Farms in Canada is One of Promising Features of Immigration

The migration of British juveniles for farms in Canada, is one of the most promising features of the immigration situation at the present time," stated R. M. Pym, superintendent in Britain of juvenile immigration for the Colonization Department of the Canadian National Railways, who arrived in Montreal on the White Star liner, "Laurentie," for the annual conference of National Railway Colonization department officials.

Mr. Pym arrived with the final party of British juveniles for the season, numbering some 83 boys, and commenting on the amazing development of juvenile immigration from the British Isles, Mr. Pym stated that altogether this season a total of 1,180 boys had been brought out under the auspices of the Canadian National Railways. This was an increase of 134 per cent. over the season of 1928, and when it was considered that 1928 season showed an increase of 84 per cent. over 1927, it could be realized to what a great extent juvenile immigration had become a factor in the general situation.

More than 1,000 of the boys coming forward this year, were placed by the British Immigration and Colonization Association, of Montreal, on farms throughout Ontario. The balance have been placed by other organizations in both eastern and western Canada. "About 97 per cent. of these boys have definitely made good," said Mr. Pym. "Something like one half per cent. have had to be deported, while the remaining small percentage might be said to be still on the fence, with respect to their desire to stay in this country." Generally speaking, the boys come from good middleclass families and many of them are fairly well educated, bright and enterprising and eager to make a career for themselves in the new country.

"One of our greatest difficulties in juvenile immigration work," said Mr. Pym, "has been the prevalence of the old idea, still persisting in the Old Country, that boys and young men were sent to colonies only as a last resort, if they were wayward or criminally inclined. It is surprising to what extent that idea still persists, and it is only gradually that we are replacing this with the true idea that Canada is a wonderful land of opportunity, and that British boys and Britshers in general are welcome here and that in this country they may build for themselves a future not possible in the old world."

"The juveniles movement has become very popular and the prospects for next season are exceedingly promising," stated Mr. Pym.

Women Explorers

Three young women, Baroness Christa von Bradenstein, Miss Neda de Namur, and Miss Margaret d'Angelo, recently set out from New York to explore Alaska, the Gobi Desert, and the wilds of Australia. Loaded in the back of their car they had a tent, three army cots, a motion picture camera, an ordinary camera, a typewriter, a camp stove, and a German shepherd dog.

"When we were first married you were only too glad to wipe the dishes."

"I know, but that was when we only had two dishes."

"My wife examined my pockets last night."

"What did she find?"

"What all explorers find—material for a 'lecture!'"—Gutierrez, Madrid.

W. N. U. 1804

Portable Hog Cabins

Small, Movable Cabins Will Be Found Of Great Advantage

While a substantial hog pen is necessary on a farm where pigs are raised to any extent, it is of great advantage to make use of small movable cabins, particularly for housing brood sows under winter conditions or under summer conditions when on pasture. The small cabins are also useful as a shelter for growing pigs in summer when on dry lots or pasture. The Dominion Animal Husbandman, in his report for 1928, published by the Department of Agriculture, at Ottawa, recommends a cabin with a floor area of fifty square feet. A cabin of this size will comfortably house five adult brood sows when fed outside and given the run of the yard. Such a structure has been found at the experimental farms to be inexpensive and in many instances may be constructed from material which is found on the farm. The A-shaped cabin popular some years ago, has lost favour at the experimental farms, as the sloping roof is apt to be broken away by the hogs when crowding inside. The walls should be perpendicular for three or four feet with a ridged roof above.

YOUTHFUL COTTON PRINT

All the smart young folk are making their morning and sports frocks of cotton fabrics, because they are so easily made, and the cost a mere trifle. Take the model illustrated in red and white printed plique with vivid plain red bias binding emphasizing scalloped outline of side closing bodice, and edge of kimono sleeves. Why it is made in less than two hours! Only a few seams to join! Style No. 555 comes in sizes 14, 16, 18 and 20 years. Hade in plain white plique for tennis, it will appear quite different. Peach shantung, gingham check in orchid and white, yellow sportswear linen, orange silk crepe, capucine tones in printed lawn, voile in pin check in green and white, and white angora wool jersey are stunning ideas. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

The Combine Harvester

No Reason Why Combine Cut Grain Should Not Grade As High As Grain Cut By Binder

About 600 cars of average grain crop may be harvested in a season by the modern combine reaper-thresher having a width of cut of 15 or 16 feet. On the same basis a machine cutting a 100 foot swath would handle about 400 acres. These figures have been arrived at in seven year's experience with the combine reaper-thresher at the Swift Current, Saskatchewan, experimental station.

The results of this experience with work done not only on the station, but on many farms throughout the province, are presented in Bulletin No. 118, of the Department of Agriculture, at Ottawa. Most of the combines included in this study threshed the wheat as it was cut, while others were equipped with a windrow harvester and pickup. In using the combine it is shown that caution must be observed in the date of commencing its use and proper recognition must be taken of the effect of even light showers, dews, and white frost on standing grain. When all these precautions are intelligently observed, the officials of the stations, who have been studying the question, feel that there is no good reason why combine cut grain should grade lower than binder harvested grain.

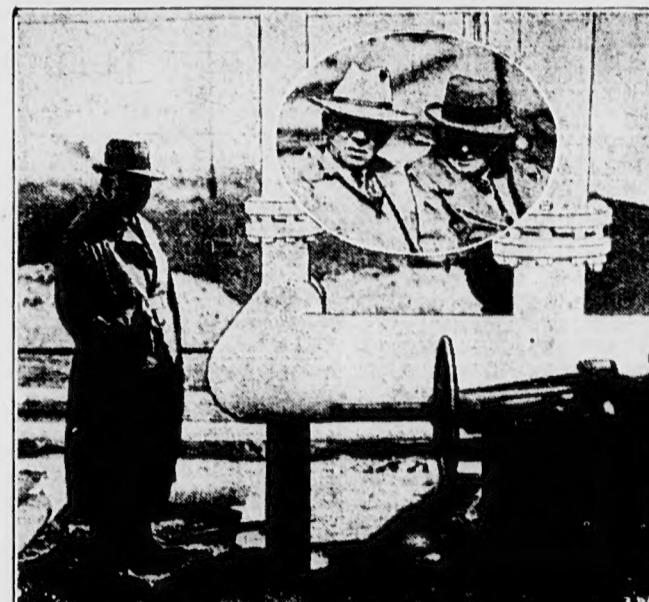

Practically all cases of toughness and dampness arising from the use of the combine are believed to be due either to a too early start, or to harvesting early in the day following a night of dew or white frost.

Mrs. Soap: My husband has left me. He ran away with our maid.

Mrs. Sudds: How terrible! Isn't it? It is so hard to find servants now.

There are 7,000 miles of water mains in London.

Winston in the West

Rt. Hon. Winston Churchill who is touring Canada over Canadian Pacific lines, inspected oil developments in Alberta and is here seen looking at the frost-covered pipes that convey the oil from the Home Wells, in the Turner Valley to the separators. He was accompanied by his brother, Major Churchill, and his son Rudolph. Inset shows, Mayor Osborne, of Calgary, and Mr. Churchill leaving for the oil fields.

Various Live Stock Organizations Are Being Called Upon For Increased and Better Production

Value Of Research Work

Once Destructive Agent Now Used As a Fertilizer

The fact of making two blades of grass grow where one grew before has been excelled by researches conducted at the smelter, at Trail, B.C. Hitherto the sulphuric dioxide fumes, highly destructive of vegetation, have made the districts about such works a wilderness. Lawsuits were the only productive crops on the farms roundabout, and the company had to pay large sums in damages to the farmers. Similar trouble was experienced in the neighborhood of the nickel smelters in the Sudbury district.

Chemists were put to work to find a remedy. They have not only done this, but have discovered an unexpected value in the baleful fumes. A process has been evolved whereby what was once a destructive agent can be utilized in the manufacture of a fertilizer for which there is said to be an unlimited market on the prairies.

The announcement of the discovery includes a statement that a plant to cost seven or eight million dollars, will be built at Trail for the manufacture of this chemical fertilizer. It will call for large additional electrical development, so that business generally will be stimulated.

The incident illustrates the far-reaching value of chemical research. It vindicates the expenditures which Ontario and the Dominion have undertaken in this direction.—Toronto Telegram.

Sheep and Lamb Fair

Manitoba Sheep Breeders To Hold Annual Show At Brandon

Preparing the way for a sheep and lamb fair this autumn that will be even larger than a year ago, the directors of the Manitoba Sheep Breeders' Association have fixed October 30 and 31 for the annual show. As usual, the fair is to be held in the Winter Fair Arena, at Brandon, and on a scale that will attract wide attention. A year ago there were 600 lambs entered in the show which is fast reaching record proportions, and the directors anticipate a larger entry this year because of more favorable conditions. The recent movement in the province to place sheep on Manitoba farms is expected to lend considerable interest to the Brandon show.

Winnipeg Grain Exchange

Membership in the Winnipeg Grain Exchange has been raised to \$50,000. A resolution that the cost of membership be raised to this figure was carried unanimously at a meeting of the Grain Exchange on August 27th. The last membership was sold for \$28,700.

Every exhibition and various live stock organizations receiving federal government aid are being called upon to boost for increased and better production. Hon. W. R. Motherwell, Minister of Agriculture, sounded that note at the National Exhibition in Toronto, and it will be repeated from one end of Canada to the other.

The Department of Agriculture is convinced that Canadians have mighty appetites, and as a result, they are eating much of the produce that used to go for export. In the face of an increase of 148,000,000 dozen eggs per annum last year, over the total of 1920, Canadians consumed so many that there was scarcely enough left for export to balance the eggs imported during the winter months. Accordingly Canada is now practically off the map as an egg exporting country. Canadians per capita have a considerable lead over any other people in the world in the consumption of eggs.

The situation with regard to butter is practically the same. It is claimed that in proportion to its population, Canada beats the rest of the world in the amount of butter it uses. So in spite of a steady increase in production there is no butter to export. Poultry and lamb are also in the class of products which Canada grows great quantities and now consumes all.

Canada's exports of bacon are falling off at the rate of about 30,000,000 pounds a year. If it keeps up in two years she will be off the export market although the hog population is greater than it was ten years ago.

The Department of Agriculture is accordingly trying to step-up production in the above commodities. It is urged that this is a time of big production in every other line of activity. Farmers and their families want more than they used to expect in the way of luxuries, and the farmer to pay for these must produce on a greater scale than when his wants were less pretentious.

Many reasons are given for the increase in food consumption by the people of this country. It is claimed to be increasing faster than the growth in population. The great influx of United States tourists is given as one reason. Another is the development of outside or semi-outside occupations such as the paper mills and the mining industry, where workmen as a rule eat more than at inside jobs. Then Canadians are a busy people and busy people, Mr. Motherwell said in an interview recently, eat more than loafers.

Importation Prohibited

Ban Is Placed On Cattle From Scotland, Owing To Outbreak Of Foot and Mouth Disease

A ministerial order signed by J. H. Grisdale, Federal Deputy Minister of Agriculture, cancels all permits for the importation of cattle, sheep, goats and other ruminants and swine from Scotland to Canada. The only exceptions to this order are those already embarked on vessels en route to the Dominion. The order is under the provisions of the Contagious Diseases Act, and is made on account of an outbreak in Lanarkshire, Scotland, of foot and mouth disease. Similar restrictions are in effect regarding shipments of these animals from England.

In a few years malaria has reduced the population of the town of Birnagar from 80,000 to 2,300.

LOCAL & GENERAL

Mesdames McRae and Ranton were Calgary visitors Friday.

Miss Vera Sexsmith was a visitor to Calgary over the week end.

Mr. Ed. Ford was a visitor to the city of the foothills on Sunday.

Miss Marjorie Clements of Big Prairie was a week end guest of Mr. and Mrs. Bruce Parker.

Don't forget the big dance in the Didsbury Opera House, Friday, Oct. 11. Bellamy's Orchestra.

We are informed that Mr. Arden Deadrick is laid up with inflammatory rheumatism.

Mr. Everett Blain shot a large eagle on Saturday with a wing spread of 6 feet, 8 inches.

Keep Saturday, October 19 open for a big meet of Didsbury U.F.A. Local No. 12. Particulars in next week's Pioneer.

LOST—An automobile tire 30 x 3 1/2 oversize. Lost between town and the Rosebud bridge. Reward if returned to the Pioneer Office.

BORN—To Mr. and Mrs. Chas Ratcliffe, of Kimberley, B.C., a son, on October 4, 1929, at the Didsbury General Hospital.

Are you single? See "The Man I Love." Are you married? See the "Man I Love"—at the movies, Saturday, Oct. 12. Starring Mary Brian, Richard Arlen, Bacalova

Mr. and Mrs. A. G. Studer motored to Edmonton a week ago Sunday and also visited their daughter Winnie, who is attending Normal School at Camrose.

Mr. Willard Axtell, accompanied by his uncle Mr. Moore, of Terrace, B.C., left on Wednesday on a trip to the Peace River district.

The local C.G.I.T. group will hold a tea and sale of home cooking in the United Church basement, Saturday, October 12, from 3 to 6 p.m.

Mr. and Mrs. J. Huget were visitors by motor to Daysland a week ago Sunday paying a visit to their daughter Aleda who is teaching school near that point.

Ranton's Ltd. have installed one of the most up to date cash registers obtainable, operated by electricity and costing approximately \$1400.

The answer to Beau Geste—Beau Sabreur," at the movies, Didsbury, Wednesday, October 16. A special attraction featuring Gary Cooper, Noah Beery, Wm. Powell, and Evelyn Brent. 8:30 p.m.

The Didsbury Public Library Board wishes to draw attention to the public that borrowers who keep out books more than 14 days will be fined two cents a day. Borrowers will not lend their books to others, such a practice causing confusion in the records.

WHAT OTHER EDITORS ARE SAYING**THE MOTOR HORN**

"The motor horn is a blot on our standard of intelligence," writes G. R. Stirling Taylor in the Fortnightly Review, London.

"Only the dullest of dull bureaucrats could ever have imagined that the horn was a way of preventing accidents on the roads. It is merely a temptation to a motorist to drive at a high speed on the assumption that other users of the highways will hear and be scared out of the way."

"To suggest to the thousands of thoughtless creatures who drive cars that their responsibility to their fellow-citizen can be discharged by pressing a horn bulb with their thumb or foot is a license to take risks. To insist on every car carrying a horn is almost as stupid as if the education authorities insisted on every boy carrying a packet of T.N.T. in his pocket. Both horn and explosive are incitements to crime. Probably the first step towards safety on the roads, for both cars and walkers, would be to make the use of a motor horn a criminal offence. Drivers would then take reasonable precautions at corners instead of gambling chances."—Calgary Herald.

Three hundred and sixty miles per hour in an aeroplane hurtles one through the air at a rate of over 500 feet to the second. The old earth, it might be pointed out, has been rolling through the air for some time at a speed nearly three times as great—and without any appreciable fuss.

Used articles, if still useful, are marketable for cash. Try a "Pioneer" want advt.

Burnside Notes

Mr. John Miller who has been spending the summer at High River spent a few days at his home here, en route to take a position near Seattle.

Mr. Geo. Simpson, who has been visiting his friend Mr. Harry Pearson here, left last week on his return trip to his home near Los Angeles, Cal.

Mr. Cecil Clipperley is home from High River where he spent the summer.

Mr. O. Enman left last week to take a position in Calgary for the winter months.

Mrs. Grevett of Calgary will address a meeting in Mountain View community hall, under the joint auspices of the two institutes, Mountain View and Lone Pine on Tuesday evening, October 15th.

Messrs. Nelson, McLean, Jack Stuart and Bruce Shiels are on a ten day holiday in the Peace River country.

Mr. A. B. Claypool, M.L.A., will address the regular meeting of the Burnside U.F.A. on Monday evening, October 14. Everybody cordially invited.

Mrs. Fred Thompson and Mrs. N. Eckel were Saturday visitors to Olds.

Miss Laura Smith was a visitor to the southern city on Saturday.

Mr. Gene Axtell returned on Tuesday from Saskatoon.

THE FORD CAR SHATTERPROOF GLASS WINDSHIELD

*Protection with Clear Vision*

THE shatterproof glass windshield on all Ford cars is one of many important safety features that contribute to the pleasure and comfort of all Ford Model "A" owners. The peace of mind and feeling of security made possible by this factor of safety is further enhanced by the clear vision roof pillars, six-brake system, $\frac{3}{4}$ irreversible steering, one piece gas tank and all-steel body.

The Ford car shatterproof glass windshield does not splinter under the impetus of a direct blow. In case of a collision there is no flying glass to endanger driver or passengers.

The vision is clear and unobstructed with the Ford shatterproof glass windshield. At the same time the driver realizes that this windshield is a protection and a factor in creating driving confidence and owner enthusiasm.

Arrange for your demonstration ride with the nearest Ford dealer

An election of officers will take place and arrangements in regard to fees and schedules for the coming season will be made.

Armistice And Thanksgiving, Monday, Nov. 11

Armistice Day and Thanksgiving Day coincide with respect to their both falling on Monday, November 11th, this year. The current issue of the Canada Gazette accordingly publishes a proclamation declaring that day to be one of public thanksgiving.

OBITUARY

Henry Eby Weber was born on April 4th, 1853 near Kitchener, Ontario and passed away in peaceful sleep at his home, Didsbury, at sunrise, Monday morning, September, 30, 1929, in his 76th year.

His demise was preceded by a lingering illness of several years duration. The deceased, though not often heard publicly, let his light shine nevertheless, always endeavoring to practice a religious outlook on life.

He was reared in Ontario, under the religious influence of the old Mennonite Church. In late years he took great delight in tracing his ancestry which on his mother's side reaches back to the 16th century to his forefathers in Switzerland, one of them being a bishop in that denominational five or six generations back. Due to religious persecution one named Theodorus Eby and his family left Switzerland about the year 1704, stopping a few years in Germany, then emigrating to Pennsylvania.

In 1807 the descendants of Theo. Eby moved to Berlin (Kitchener), Ontario, of whom one named Benjamin Eby, grandfather of the deceased, became bishop of the Mennonite Church at Kitchener.

The deceased, however, on coming to Didsbury from Ontario with his family about 20 years ago made the Evangelical Church his choice and remained a faithful member to the end.

One daughter predeceased him in death. He leaves to mourn his departure, a sorrowing widow, one son and three daughters.

The funeral service was held on Thursday afternoon, October 3, in the Evangelical Church with a large audience in attendance. The pastor, Rev. H. E. Roppel preached the funeral sermon from Psa. 90:12, "So teach us to number our days, that we may apply our hearts unto wisdom." Rev. C. J. Hallman also took part in the preliminaries. Interment was made in the Didsbury cemetery.

CARD OF THANKS

We wish to express our thanks to the neighbors and friends for the lovely floral sprays and other expressions of kindness and sympathy.

Mr. and Mrs. W. A. Swingle and family.

Mrs. Julia M. Jennings.

We desire to thank the friends and relatives for their sympathy and floral offerings during the recent illness and bereavement of our late husband and father.

WRIGLEY'S

Selling Empire Goods

British Industries Fair Has Opened Up Great Possibilities

The British Industries Fair was an appropriate occasion for directing thought to what British industries can do, although it is not yet all that its name implies. Premier Baldwin is looking forward to the time when the dominions will follow Canada's example and make it a market truly representative of Empire commodities, when the best available from all over the red map will show the productive capacity of the British commonwealth of nations. Then it will be realized what the Empire means in terms of trade and commerce, what the potential field for business in one part is for all other parts, and how each can help the other to make the whole greater. The manufacturers of this Dominion who contributed to the exhibition are to be congratulated upon their enterprise and their readiness to pioneer in helping to make the fair international in scope.

Preservation Of Eskimo

Tribute was paid to the Dominion Government, the Royal Canadian Mounted Police and the Hudson's Bay Company, for the splendid work being done for the preservation and the well-being of the Eskimo, by Ven. Archdeacon A. L. Fleming, appointed recently to take charge of Anglican mission work in the Arctic.

"Do you know Lord Henthorn? I've often shot at his country seat." "And did you ever hit it?"

TIRED, WEAK, NERVOUS WOMAN BENEFITED

Praises Lydia E. Pinkham's Vegetable Compound

Asbestos Mines, Quebec.—"After the birth of my second child, I was always feeling tired, nervous and weak and had headaches and terrible pains every month. I suffered two years before I tried Lydia E. Pinkham's Vegetable Compound. I got four bottles at first and it did me a world of good. I would not be without it in the house now, and have another six bottles in. I recommend it to every woman I know."—Mrs. T. BARRITT, Box 114, Asbestos Mines, Quebec.

Pickup Device For Planes Is Success

Can Be Loaded In Flight By Cataapult Machine

After tests of a catapult pickup device, Lieut. H. B. Clarke manager of the Roosevelt flying field, announced that in about a month he would attempt to better the refueling endurance flight record of the army plane Question Mark.

The machine, invent'd by A. W. Carl and Henry Bushmeyer, is a circular contraption that can be wheeled about to any position and set up in a few minutes. A dangling rope from the plane releases the catapult just as the article to be picked up is automatically fastened to the rope. This throws the article toward the plane as the rope is reeled in and prevents shock.

Six tests were made by Clarke, packages ranging up to 40 pounds being picked up. The lightest package contained a dozen eggs, none of which was broken.

Clarke said he would use a multi-motored plane for the endurance flight, picking up fuel in 250 pound lots. He expected to have an alternate pilot and a mechanic on board, and is considering changes of pilots during the flight.

Bushmeyer said that a test of such change would be made shortly, he placing himself in the car and letting a plane reel him in.

Recipes For This Week

(By Betty Barclay)

LUNCHEON DELIGHT

4 eggs.
1/4 cup grated cheese.
1/2 cup soft bread crumbs.
1/4 teaspoon salt.
1 cup white sauce.
Few grains cayenne.

Break the eggs into buttered baking dish and cook in hot oven until they begin to turn white around the edge. Then cover eggs with white sauce, and over this the mixture of crumbs, cheese and seasonings. Brown in very hot oven, so eggs will not be overcooked by time cheese is brown.

PEANUT RICE SALAD

3 tablespoons rice.
1 cup orange juice.
1/2 cup finely chopped peanuts.
Cream cheese balls.

Wash rice and cook for 7 minutes in boiling salted water; drain. Cover with orange juice and cook in double boiler until rice is tender. Cool, mix with finely-chopped peanuts; sprinkle with salt and arrange on lettuce leaves with cream cheese balls. Serve with cream mayonnaise or French fruit dressing.

An Oil That Is Prized Everywhere.—Dr. Thomas' Eclectic Oil was put upon the market without any flourish over fifty years ago. It was put up to meet the wants of a small section, but as soon as its merits became known it had a whole continent for a field and it is now known and prized throughout this continent. There is nothing equal to it.

Mount Robson Summit Camp

Famous Camp Will Be In Operation Again This Summer

Mount Robson Summit Camp at Berg Lake in Mount Robson Park, British Columbia, will be in operation again this summer according to an announcement made recently by officials of the Passenger Department of the Canadian National Railways. The camp is situated near the shore of Berg Lake, which lies on the north side of Mount Robson, the highest peak in the Canadian Rockies. The lake is named from the fact that it is almost continually covered with ice which flows from the Tumbling Glacier.

The bungalows which form this camp are located almost at the Alberta and British Columbia boundary and they form a splendid headquarters for a number of scenic trips, both for hikers and for horseback riders.

Milk Exports

Canada exported over nine million dollars worth of milk and its products for the twelve months ended February 28, 1929, an increase of three million dollars over the previous corresponding 12 months.

Minard's Liniment relieves pain.

Electric Power For West

Systems Of Saskatchewan, Alberta and British Columbia To Be Connected

Within ten years the electrical power systems of Alberta, British Columbia and Saskatchewan will be inter-connected, and the principal centres of these three provinces will be served with a dependable supply of power from hydro and steam sources, it was predicted by M. L. Wade, general superintendent of the East Kootenay Power Company, at the annual meeting of the Association of Professional Engineers of Alberta, held in Lethbridge.

Little Help For This Week

"I know the thoughts that I think toward you, saith the Lord, thoughts of peace and not of evil, to give you an expected end."—Jeremiah xxix. 11.

His perfect plan I may not grasp; Yet I can trust Love infinite. And with my feeble fingers clasp The Hand which leads me to the light. My soul upon His errand goes; The end I know not, but God knows.

Every human soul has a complete and perfect plan cherished for it in the heart of God,—a divine biography marked out which it enters into life to live. This life, rightly unfolded, will be a complete and beautiful whole, an experience led on by God and unfolded by His secret nurture, as the trees and the flowers by the secret nurture of the world. We live in the divine thought. We fill a place in the great, everlasting plan of God's intelligence. We never sink below His care, never drop out of His counsel.—Horace Bushnell.

Rich Gold Strike

Reported Discovery Of Fabulous Mine In Red Lake District

The Toronto Mail and Empire publishes the following dispatch from Sioux Lookout, Ont.:

"Patricia, long accustomed to reported gold strikes, is all excited over the latest word from the Red Lake country.

"A strike so rich is reported that even in an optimistic prospecting country the rumor is received with disbelief. Rumor has spread that the motherlode of the north land has been uncovered, that gold sticks out in chunks—actual, visible gold of the kind that wedding rings used to be made of, so the story goes.

"The location of what is reported as Red Lake's most sensational find, is being kept a deep secret, but already prospectors are preparing to pour into a new section.

"One report says that the gold is sticking out with 50 per cent. values in dark blue quartz—no sulphides showing. The vein so far traced, it is said, ranges from eight to 40 feet."

Tempering Copper

Two London (Ontario) men, a bank clerk and a motor mechanic, claim to have discovered the art of tempering copper. They are John Cameron, mechanic, and Hugh Webster, banker. The discovery, made by accident while experimenting with copper, promises, it is said, to revolutionize the use of the metal in industry. Several pieces of the tempered metal are so hard they file like hard steel.

Corns cripple the feet and make walking a torture, yet sure relief in the shape of Holloway's Corn Remover is within reach of all.

New Author: Could you use my story if I were to boil it down?

Editor: No chance. Boil down a gallon of water to a pint and it would still be water, wouldn't it?

Sir Arthur Keith, British scientist, said that fish have no memory and no mind. He learned that in a laboratory, not in a trout stream.

The popular breakfast entree, the grapefruit, is said to have been introduced into Florida in the sixteenth century, by the Spaniards.

IT'S folly to suffer long from neuritis, neuralgia, or headaches when relief is swift and sure, thanks to Aspirin. For 28 years the medical profession has recommended it. It does not affect the heart. Take it for colds, rheumatism, sciatica, lumbago. Gargle it for a sore throat or tonsilitis. Proven directions for its many uses, in every package. Every drug store today has genuine Aspirin which is readily identified by the name on the box and the Bayer cross on every tablet.

Aspirin is a Trademark Registered in Canada

Capital Invested In Irrigation
Construction costs of ten major irrigation projects, now operating in southern Alberta amount to about \$31,800,000, or an average cost of approximately \$31 per acre for the area of slightly more than one million acres.

FASTER-FASTER-FASTER

In the sky and on the highways modern motors, developing greater power and operating at higher speeds, demand better lubricants. Marvelube was developed to meet this demand. It is a better motor oil because it is made by better methods from a better crude petroleum.

Produced by the Special Marvelube distillation process, it is free from injurious sulphur and costly carbon. It has remarkable body, and because it is manufactured under the constant supervision of Canada's most expert refining technicians you are sure of unvarying quality and unending satisfaction.

Aircraft operators, the most exacting buyers of oil, prefer Marvelube because it has been proved in actual service that it affords longer intervals between engine overhauls.

Marvelube insures smoother performance for any car, old or new. There is a grade of Marvelube refined to meet the exact requirements of your car. Consult the Marvelube recommendation chart at good dealers' or at Imperial Oil Service Stations.

WORLD HAPPENINGS BRIEFLY TOLD

New Zealand will appoint a trade representative in Canada, it has been announced. Growing commerce between the two countries is given as the reason.

The monoplane Bremen, first to cross the North Atlantic from east to west, is to be placed on permanent exhibition at the Museum of Peaceful Arts, in New York.

A young peach tree bearing a fruit, half of which was a peach, and the other half a nectarine, was exhibited at the recent show of the Royal Horticultural Society in London, England.

Exports of Canadian wheat during the month of August totalled 10,156,266 bushels with a valuation of \$14,397,493, according to returns compiled by the Dominion Bureau of Statistics.

The R-100, British dirigible now under construction at Cardington, England, which was expected to make a trans-Atlantic flight to Montreal this fall, will not do so until next May, according to officials of the Department of National Defence.

Hon. Dr. Robert George Brett, pioneer medical practitioner in Alberta and one of the most outstanding public men in the province, died recently in Calgary, at the age of 78, after an illness extending over several weeks.

Premier Mackenzie King proposes to make a trip, probably to the Pacific Coast, starting about the end of October. It will be a somewhat hurried trip, the prime minister said, but he will make a number of speeches, some of them, in all probability, on the way out to the west.

A Corrector Of Pulmonary Troubles.—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

Served In Riel Rebellion

Captain H. O. Gray, 74, for years a crack rifle shot on teams representing Canada, died in a hospital at Ottawa. He was a member of the Ottawa sharpshooters during the Riel Rebellion in 1885. He was a member of the council of the Dominion of Canada Rifle Association.

People in the United States use up more than a million lead pencils each year.

Diamonds From Sugar

Scientist Produces Sparkler That Was Made In Laboratory

Predictions that large and beautiful real diamonds can be made by man, was made to the American Chemical Society, at Minneapolis, by Professor J. Willard Hershey, of McPherson College, McPherson, Kansas.

He laid on a glass slide a tiny crystal, the size of a grain of sand. He said it was a real diamond, produced in his laboratory at McPherson. It was made from ordinary pure table sugar subjected to pressure estimated at ten tons to the square inch.

WHEN BABY IS WELL MOTHER IS HAPPY

The happy mother is the one whose baby is well—it is the laughing, gurgling baby who always brings joy to the home. When baby is ill everyone in the home suffers—not only through worry over the little one but through loss of sleep—no one can find rest with a sick baby in the home. Thousands of mothers are happy mothers because they have found the way to keep their little ones well—or if sickness does come on suddenly, as it usually does with little ones, they have found the way to speedily bring the baby back to health again. Mrs. George Kech, Lethbridge, Alta., is one of these mothers and she writes as follows:—"I am the happy mother of a seventeen-month-old baby girl. Baby is healthy and strong and sleeps well at night. I give her no other medicine but Baby's Own Tablets, and she just loves them. I am never without the Tablets in the house."

Baby's Own Tablets are a mild but thorough laxative which regulate the bowels; sweeten the stomach and thus drive out constipation and indigestion and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

French Bakers Celebrate

Commemorated Four Hundredth Birthday Of the Doughnut

This generation has an evident fondness for anniversaries. People like them, and seek causes for holding them. Therefore, no person can object when French bakers decide to commemorate the 400th birthday of the doughnut.

The first example of the famous comestible was made in Paris in 1529. Some time later it got passage over the Channel into England, and from there made its way with household effects and other ideas to this continent.

The first doughnut, we read in the Christian Science Monitor, was shaped like a crescent. That is, of course, interesting, but is of comparatively little importance. The real thrill will come with the name of the genius who first took a hoe and molded the doughnut round the vacant space.

Painless and perfect in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognized in a feverish restlessness, frequently ending in convulsions. A point of notable importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are toned up into a very healthy condition.

Research Possibilities

By DR. H. M. TORY, President National Research Council

No one can realize what may be before us. I saw a statement made by a distinguished professor of chemistry that if we could write down the formulae for all combinations possible from a molecule containing one hundred atoms, these formulae alone would fill all the pages of all the books in the world. He was giving that as an illustration of the wide open field that lies before the chemists of this country in developing its chemical industry. Fifty years ago, there was no such thing as a strictly chemical industry. Last year in Canada alone there were invested in chemical and allied industries \$750,000,000 which produced \$500,000,000 worth of products, while in the United States the corresponding production amounted to approximately \$7,000,000,000.

Consider the postage stamp. It sticks until it delivers the goods.

Women In Airplane Factories

Are More Adept At Finer Adjustments Than Men

Much of the most exacting work in the construction of an airplane is done by women workers. Builders have found that women are most adept at shaping and sewing the fabric covers of wings and making certain delicate adjustments on the wings and struts of airplanes. Also, they are often called upon to plan the decorations of the interiors of planes built on special orders.

Major Reuben H. Fleet, president of Fleet Aircraft, Inc., of Buffalo, has many women workers in his plant. "We find that women can do the complicated work of covering the wings and assembling ribs and fitting them more accurately and in less time than men," he said.

Had Diarrhoea Bowels So Active Feared For His Life

Mrs. S. J. Jago, Canobie, N.B., writes:—"My little boy, when three years old, had a severe attack of diarrhoea. The bowels were so active, and he vomited so much, I feared for his life. I tried many medicines, but he was always getting worse. A friend told me of

and after the second dose I saw an improvement. I gave him almost half a bottle and he was completely relieved.

"I have used it for the other children, and my husband and myself. My husband gives it great praise,

and when he goes away from home to work he always takes a bottle with him."

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Natural Gas Exploitation

Exploitation of the district along the South Saskatchewan River, in the neighborhood of Riverhurst, with a view to ascertaining the possibilities of natural gas is to be undertaken on a more extensive scale within the next few weeks, it is reported.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

The man who feels a small job beneath him is invariably too small for a bigger one.

EAGLE BRAND CONDENSED MILK.

Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavour is so uniformly excellent. Insist upon getting it from your grocer—refuse substitutes of inferior quality.

Lure Of the Northland

Ottawa Deluged With Inquiries Regarding Port Churchill

The lure of the North is strong in the hearts of the Canadians. Any one doubting this should see the correspondence pouring in on the Department of Railways and Canals asking to be allowed to go to Churchill. The flood of requests started when a news item announced that it might be possible trains would be running by the end of the month.

Every one seems to be wanting to go North. The requests come from Boards of Trade wishing to send parties up there from Legislatures wanting representatives on the ground, big commercial interests desirous to be early on the scene and the great mass of individuals who want to grow up with the port. It is rather embarrassing to the department, because at present the only buildings at Churchill are those to house the men engaged on the dredging and the railway construction. The only food supplies, there are those belonging to the Government.

Hon. C. A. Dunning, Minister of Railways, announced Sunday that his department was preparing a statement which will be published soon, explaining the whole situation there. During the summer the construction gangs have continually been called upon to feed adventurous people who made their way by air or otherwise to Churchill without making any provision as to what they should eat after they got there.

The Manitoba Government will have the job of supervising the building of the town. The Federal department is concerned only with the railway and the port improvements. It looks as if Churchill would be a Mecca for tourists from the start and the first call will be for a hotel.

Juveniles To Compete

Boys' and Girls' Swine Clubs Membership Is Necessary

More than five thousand boys and girls on Canadian farms will be taking part in the annual swine club and calf breeding contests in the various provinces this year, for which the Canadian National Railways offer prizes and trophies, it was stated recently by Dr. W. J. Black, Director of Colonization and Agriculture, of the National System. Through the stimulation of the assistance offered in this work by the railway company, in bringing the boys and girls together in annual competition, the work of the clubs has progressed rapidly, particularly with respect to calf clubs. There will be nearly 200 of these in operation this year, there being a 400 per cent. increase over last year.

Wheat Marketing On Protein Basis

Dr. Robert Newton, professor of field crops, of the University of Alberta, has been asked by the National Research Council, of Canada, to make investigation of the possible reception which would be given in Europe to a system of marketing wheat on a basis of protein content. The report will be prepared for the next session of Parliament.

Minard's Liniment — Used for 50 years.

Huge Milk Shipment

Largest Consignment Of Its Kind Shipped From Aylmer To Western Canada

Seven hundred and fifty thousand cows working in high gear for one whole day could contribute just enough milk to make up a shipment which left Aylmer, Ont., on a special Canadian National Railways freight recently for the west. Product of an Aylmer Milk Evaporating Company, it was the largest shipment of its kind ever to leave any point in Canada, and made up a train consisting of 200 cars. There were 11,880 cases containing 700,000 cans and weighing 353 tons in the consignment which is destined to grace the tables of farm houses during coming season. It required 1,500,000 pounds of fresh milk to make up this shipment at the largest evaporated milk plant in Canada. The product has a value of \$65,000 and is pointed to as a sterling example of an extension of the dairy industry in Canada.

Although a small part of the shipment will reach the Pacific Coast, it is, in the biggest part, for consumption throughout the prairie provinces.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

Married women in Dallas, Texas, are not permitted to hold positions outside their homes, unless there are "especially mitigating circumstances."

James Fenimore Cooper could not write unless he was chewing gum drops, it is said.

NEVER wait to see if a headache will "wear off." Why suffer when there's always Aspirin? The millions of men and women who use it in increasing quantities every year prove that it does relieve such pain.

The medical profession pronounces it without effect on the heart, so use it as often as it can spare you any pain. Every druggist always has genuine Aspirin tablets for the prompt relief of a headache, colds, neuralgia, lumbago, etc. Familiarize yourself with the proven directions in every package.

In the best package—Clean, bright aluminum

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, a singing waiter at Blackie Joe's New York night club, wins fame as a composer of popular songs. Grace, the cigarette girl at Blackie's, who loves Al without his knowing it, is left behind. He marries Molly Winton, a ballad singer, and makes her famous, too. She does not love him. Molly has a baby, Junior, whom Al adores. Al becomes part owner of the fashionable Club Bombo, and on the night of the third anniversary of his marriage presents his beloved Molly with a diamond brooch. He does not know that Molly, while approaching the club in her limousine, was ardently kissed by his friend, John Perry, who begged her to leave Al. On the way home with Al she is moody. When she sees Al later in the nursery bending devotedly over sleeping Junior, his baby son, her conscience bothers her. This, in turn, makes her angry at her husband.

CHAPTER XIV.

Al heard Molly's step and turned to embrace her. She deftly avoided his grasp, stifling the look of aversion in her eyes as she did so. Al thought nothing of it; he believed she was merely anxious to avoid any noise that might wake Junior. Again he made a move as if to touch the child, but Molly caught his hand.

"Sh!" she murmured in an irritated voice. "Don't wake him. I'm tired. He might cry."

Al pretended in earnest pantomime that he had no intention of waking Junior, but, unseen by Molly, his other hand crept toward the protruding toe of the boy. The truth was Al couldn't bear the thought of going to bed without a word or two with little Junior. So as Molly turned away to go to her own room Al nudged the baby's foot and smiled to himself. Junior's eyes opened sleepily and, as he recognized his father, he murmured, "Hello, daddy."

At the gentle words Molly turned, a smile stealing over her face in spite of herself. There stood Al, pretending surprise that Junior had awakened, but obviously delighted that it had happened. He quickly leaned over, gathered the baby in his arms and straightened up with the child held close to him. One chubby, soft arm went round his neck.

"Good boy, daddy," whispered Junior, snuggling closer. "Came home."

Swiftly Al carried his precious bundle toward Molly, who waited, a look of indiction upon her face. She wanted to see Junior and cuddle him, too, yet the sight of his innocent baby face at this moment

sharpened her guilty thoughts and aggravated her irritation toward Al. But Al was holding Junior toward her, so there was nothing to do but take the child in her arms.

"Be more careful," she whispered petulantly. "You're spoiling my orchids."

Al noticed her tone and quickly took Junior from her. But as soon as she had left the nursery and Junior sat down on his father's lap, the baby began to chat volubly. He was thoroughly wide awake and Al forgot his chagrin over Molly's irritability in his delight over Junior. Was any sound as sweet as that high childish treble?

"How big are you, Junior?" he asked.

The baby's tiny arms were spread wide as he gave the required answer:

"So-o-o big!"

Al's head went back, as he laughed delightedly, just as if they had not gone through that nursery ritual thousand times. Then Junior turned and demanded, "Now, daddy, tell me story."

"Story?" repeated Al. "What kind? Animal story, giant story?"

"Frog story," answered Junior briefly, settling down comfortably in Al's protecting arms.

"All right," agreed the father. "Now listen closely. Once there was a fat old froggle who lived in a hole in the ground under a great big tree. He had a big deep voice and—"

Al glanced down—Junior's eyes had closed. He tried desperately to hold them open, but again they went shut as the story continued.

When the tale was ended he was sleeping quietly. Then Al, singing to him softly, put him back into his bed and tucked him in. His toy was placed beside his open hand where he would see it first thing in the morning, and then—one last adoring look, a quick kiss, and Al tip-toed from the room.

Molly had disrobed the moment she reached her room and slipped into a negligee. But her door was open and, as she went about the business of cold-creaming her face, she could not help but hear the sounds of joy and perfect comradeship that came from the nursery. Somehow, they cut into her consciousness like acid on a raw wound, so that she quite forgot what she was doing. The anger she had felt and stifled when she entered the apartment now returned in greater force than ever. It seemed to her that everything that Al had done tonight irritated her. Even his presentation of the brooch had a bad conclusion, for it had made John Perry discreetly withdraw from the party. And Al's pride in her and love for her, instead of soothing her vanity, worked just the other way.

At this moment she glanced in the silence no longer.

"You heard me!" she exclaimed harshly. "I meant it. I don't love you! Do you understand? I don't love you! Now let me alone!"

The last remark was shot at him with deadly aim and purpose, as she might have thrown a burning, blinding faggot. It was all over now, she thought; there would be no more pretending on her part. This was the climax of the storm that had been gathering force within her for more than a year. She didn't love him; in fact, she hated him now with a terrible intensity because he had made her feel unworthy by loving her too much. She wanted to hurt him with all the cruelty in her power, driving forever that adoring look from his eyes.

Al did not cringe as he listened to her, yet he knew at last that their life and comradeship together were utterly smashed. His face was pale as death. But as they faced each other, eyes agleam, hands clinched, they heard another sound like the faint sweet tinkle of a bell. It was Junior's voice, calling gently:

"Mamma. Please come to me."

Car Accidents In Iceland

Increasing Number Of Automobile Accidents Presents a Problem

Iceland, of all places under the sun, is complaining of its growing number of automobile accidents.

Just like Chicago and New York and London, this metropolis has its careless drivers and its drunken drivers. And all of this, of course, makes for more accidents.

An auto bus took a turn in a country road too rapidly. Two passengers were killed and the others injured. Icelandic authorities haled the driver into court, found that he conducted his bus in a most careless manner and sentenced him to a month in jail. His license was taken away permanently.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

W. N. U. 1804

mirror to see Al approaching from behind, his face aglow with that same expression of joy and devotion. As he came closer and slipped his arms around her she jumped up and stepped out of the embrace, making no attempt to hide her displeasure. Before Al could say anything in protest she had crossed the room.

He shook his head in astonishment. Oh, well, he thought philosophically, it was just another of Molly's moods. He made a move to cross over to her, but suddenly Molly's white arms went above her head in protest. She stood glaring at him, like an animal at bay.

"What's the matter with you, Molly?" he asked sharply, in amazement. "What have I done? For weeks you haven't seemed like yourself!"

There was challenge in Al's voice, but there was pleading, too. The expression of aversion left Molly's face; desperately she struggled to think of an explanation that would smooth things over. But it was no use—she had gone too far; there was no turning back.

"What is it, darling?" Al pleaded. "Can't you tell me? Haven't you everything to make you happy—a beautiful home—a baby—me?"

But Molly seemed to grow harder with every word he uttered. Her icy silence, as she confronted him with gleaming eyes, sent a dreadful current of fear through him. Was there nothing he could say to arouse her—to drive out this evil spirit and bring back the Molly he loved. He said with a controlled quietness that gave no hint of his madly throbbing heart:

"You act as though you didn't love me—any more. Don't you?"

At that Molly's head came up. It was as if she had been waiting, trying to force him to a show-down.

Now she was ready to speak.

"I don't love you any more."

The dreadful words were spoken slowly and soberly, but the minute they were out a look of disdain curled her lips and her eyes flashed defiance. Now—at last—she had come clean. Now, her attitude said, what was he going to do about it?

Al recoiled as if she had struck him across the face with a whip. The words seemed to travel swiftly down interminable corridors in his brain, and come echoing back.

But finally Molly could stand the silence no longer.

"You heard me!" she exclaimed harshly. "I meant it. I don't love you! Do you understand? I don't love you! Now let me alone!"

The last remark was shot at him with deadly aim and purpose, as she might have thrown a burning, blinding faggot. It was all over now, she thought; there would be no more pretending on her part. This was the climax of the storm that had been gathering force within her for more than a year. She didn't love him; in fact, she hated him now with a terrible intensity because he had made her feel unworthy by loving her too much. Idea May Be Feasible

Berlin To New York In Six Hours Is Plan Of Young Engineer

"Take a solid breakfast in Berlin and don't worry about food on the plane. You can have lunch in New York!"

This might be the last advice given by good friends to a passenger of a futuristic airplane not yet constructed, but planned by Heinrich Guenther Perl, a 21-year-old Berlin engineer. Perl claims that his plane would make the trip from Berlin to

New York in about six hours, saying that world-famous scientists and experts like Professor Einstein and Count Arco studied his device carefully, approved of it and now firmly believe in its feasibility.

The Coming Era

The air age will have fully arrived when trans-oceanic flights are made without the accompaniment of big headlines in the papers.

Birds cannot see blue or violet, but they do see red and infra-red.

Packed full of fire for any sort of ignition job—farm engine, tractor, marine motor—Eveready Hot-Shots put the pep behind your cylinders!

Last longer because they recuperate marvellously. Protected by metal case against damp, rain or accident. Give full value for your money. Ask for Eveready Hot-Shots by name. If the label does not say "Eveready", it's not a genuine Hot-Shot.

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sour. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Don't buy any car until you have driven Chevrolet

IT'S all very well to listen to So-and-so's opinion of car values, but after all, the person whose opinion counts most is YOURSELF. It's all very well to sit back and wonder how Chevrolet can produce a really high-class Six . . . put a high-compression, valve-in-head engine in it . . . employ Fisher Body genius to create and build a series of magnificent bodies for it . . . equip it in the most detailed and up-to-the-minute fashion . . . and sell it at the price of a four.

The unmatched resources of General Motors, backing up Chevrolet's own tremendous facilities, explain all that, of course. But how much more satisfying to test it all out for yourself . . . behind the wheel of the new Chevrolet Six. That is why we urge you . . . no matter how many nice things you have heard or read about Chevrolet . . . to DRIVE CHEVROLET before you buy any car.

If you don't sell yourself a Chevrolet, nobody else is going to do it. Please don't feel you are obligating yourself in any way. It's a pleasure for us to place a Chevrolet Six at your disposal.

WARNING

TO

Motor Car Drivers

CARRY Your Licenses

The Vehicles and Highway Traffic Act, 1924, Amendment Act, 1929, requires that every person operating a motor vehicle shall secure an operator's or chauffeur's license and shall at all times while driving carry same. A penalty is provided for failure to produce such licenses when demanded by an officer.

It is necessary, owing to the number of motorists who persist in driving without licenses, that the police be instructed to require the production of these licenses from time to time.

This law has been passed in the interest of safe driving, and the production of a license is the only proof of ownership of one.

Carry your license at all times and avoid inconvenience and prosecution.

Application cards may be obtained from any Alberta Police Officer, Clerks of the Court, dealers in motor vehicles, or from the postmaster in any town or village, and when completed should be forwarded to the Motor Vehicle Branch Office at either Calgary, Lethbridge or Medicine Hat, or to the Office of the Deputy Provincial Secretary at Edmonton.

HON. J. E. BROWNLEE,
Provincial Secretary.

E. TROWBRIDGE,
Deputy Provincial Secretary.

RUGBY NOTES

The October meeting of the Rugby W.L. was held at the home of Mrs. O. Krebs, with an attendance of seventeen members and five visitors. The first part of the afternoon was devoted to Home Economics and everybody was soon industrially plying their knitting needles. The knitting done will be later utilized in the making of a rug.

Following some community singing the subject of Education and Better Schools was taken up. Mrs. C. Youngs gave a very instructive paper on "Proper discipline of the child." Miss Brubacher followed up the subject with a most helpful talk on proper living condition for school children, the teaching of high ideals and the power of suggestion. The meeting closed with the singing of the National Anthem after which lunch was served by the hostess.

The November meeting will be held at the home of Mrs. A. Krebs.
